COURSE FEE
2650 AED

**TARGETED
AUDIENCE**

**Gynecologists,
urologists,
colorectal
surgeons**

Why to take this course?

- Pelvic organ prolapse (POP) is a prevalent condition affecting approximately 50% of aged women in the world.
- Most of Pelvic Floor Disorders are self managed or not treated .This approach suggests that a incidence of the pathology is underestimate
- 50% of women seeking appropriate cares undergo several diagnostic and therapeutic pathways.
- An average of 3 or more different specialist are involved in these pathways following a negative therapeutic response.
- The timing to assess a correct diagnosis ranging between three and five years
- Surgical treatments for incorrect diagnosis or improper execution, determine up to 30% a situation comparable or even worsening compared to the period before the surgery and need for a new surgery procedure.

Dr. Alessandro D'Afiero
